

Pallet Gate Product Update

Introducing the new Type “F” Pallet Gate.

We are further enhancing the range of Pallet Gates with a new design to accommodate taller pallets.

The Type “F” Pallet gate allows for much larger pallets to be safely loaded to and unloaded from a mezzanine floor than has been possible with the range previously. The new Pallet gate can accommodate pallets up to a maximum size of 1.5m/4' 11" (deep) x 2.0m/6' 6" (length) x 2.5m/8' 2" (height).

Part No: SGPGTYFGV

FAQ

What is the purpose of a Pallet Gate?

Pallet gates are used to provide fall protection whilst goods are being loaded to or unloaded from a mezzanine floor. The gate swings between an open and closed position to allow access to the Pallet from either the mezzanine or from ground level whilst providing collective protection at all times.

What is different about the Type F Pallet Gate?

The Type "F" Pallet Gate is able to cater for much larger pallets than we have been able to protect in the past. The max pallet size is now 1.5m/4'11" (deep) x 2.0m 6"6"(length) x 2.5m/8'2" (height).

How is the Pallet Gate supplied?

The Type "F" Pallet Gate is supplied partially assembled in kit form for final installation on site.

When will the Pallet Gate be available?

The Type "F" Pallet Gate is available from Kee Safety now.

What additional marketing collateral is available?

Simple renders, technical drawings and an example photograph are available.
