XPLORER

By Checkmate

The Checkmate Xplorer harness has been developed for the adventure leisure market, but is also suitable for use in a wide range of industrial applications. The harness is designed to be more comfortable than a conventional harness for short periods of suspension as frequent loadings are common in adventure activities. Suitable for both male and female users from 1m tall upwards in a range of sizes to suit all.

Front Attachment

Alloy ring for multiple attachments

Limited Slip Rear D

Rear attachment point

Alloy Buckles

For quick and easy adjustment

Curved Webbing

Follows the contours of the body

Indicator Stitching

Go/No Go stitching ensures harness is donned correctly.

Pivot Rings

Harness retains form as user moves

Leg Pads

Thermo formed and breathable

Sub-Pelvic Assembly

Provides support and comfort

EN361 :2012

EN12277 :2007 Type A

MAX User Weight 150kg

“We challenged the ordinary, we pushed the boundaries and we raised the benchmark”

The Xplorer adjustable rope lanyard has been designed for a variety of uses to prevent a worker from falling at height. A range of connectors are available as end fittings to suit multiple tasks. The three bar slider allows the user to adjust the length of the lanyard in a matter of seconds. **Note - Lanyard length is measured between the bearing points of the hooks. Exchanging a karabiner for a scaffold hook could lengthen a lanyard beyond the maximum allowable length under the relevant EN standard.**

Alloy Adjuster

The sliding aluminium adjuster allows the user to easily shorten the length of the lanyard.

Sewn Terminations

Sewn terminations stitched with contrast thread protected by a clear heat shrink for easy inspection and added safety.

Steve Woods and Sarah Ansell from SWA Leisure who initially contacted us with the vision of redesigning a revolutionary new safety harness for the leisure industry.

Steve is a highly regarded professional training instructor for the ropes course industry and active member of ERCA. Founder and Director of Vertex training his knowledge, commitment and support were vital in the development of the product.

Sarah runs her own children's activity centre in the north of England called Clip n Play, her relentless passion to find a truly comfortable and safe harness for children in particular pushed our design and engineering teams to totally rethink how we develop products for the future.

The end result is our most intuitive, innovative and most capable leisure market harness ever!
