

BLS 2600 ne»xt

POWERED AIR PURIFYING RESPIRATOR WITH DUST FILTER

BLS 2600 ne»xt PAPR is an assisted ventilation system to be used with a full face mask and dust filter. It supplies the user with filtered ambient air and thanks to the constant air flow and the absence of respiratory effort it is the ideal solution for heavy use.

BLS 2600 ne»xt guarantees excellent usability, it is impact resistant and comes with a full range of accessories and spare parts.

FILTER

BLS TMP3 filter provides high filtration for long periods. It is protected by an easily removable ring nut. A practical anti-water cap protects the filter during the decontamination shower phase.

COMFORT

The PVC belt with adjustment buckles guarantees an optimal hold around the waist, while the padded support provides maximum comfort and perfect decontamination thanks to the quick release system.

AUTOMATIC FLOW ADJUSTMENT

Thanks to the automatic flow adjustment, BLS 2600 ne»xt guarantees a flow of 160 l/min even when the filter is clogged.

BATTERY

The performing and light battery guarantees a duration of more than 10h in maximum comfort. For the charging phase, BLS 2600 ne»xt is equipped with a sturdy and ergonomic connector, while the status of charge is returned both by the LEDs on the motor unit and on the battery charger.

COMPATIBLE DEVICES

Optionally, BLS 5150 and BLS 5400 full face masks can be combined with the PAPR. All mask models are equipped with a universal connection EN 148-1 on which the corresponding connection of the corrugated hose is inserted. The masks are PPE certified according to the EN 136:1998 standard.

STORAGE KIT

Possibility of storage in maximum safety thanks to the DIN cap for the motor unit, the filter cap, the hose that can be closed on itself and the practical and sturdy container box, equipped with four handles, gasket and arrangement for the padlock.

SOUND/VISUAL/VIBRANT FEEDBACK

The innovative management system provides the operator with the following feedbacks via the 3 coloured LEDs: battery charge status, low battery alarm, flow block alarm, filter clogging alarm, recharging status. All alarms are also signalled by a sound and a vibration.

BLS 2600 ne»xt

POWERED AIR PURIFYING RESPIRATOR WITH DUST FILTER

COMPONENTS

BLS 2600 ne»xt PAPR consists of:

- n°1 motorised filtering unit, powered by a rechargeable Li Ion battery (14.8V 5.6Ah)
- n°1 corrugated rubber hose kit
- n°1 battery charger (EU + UK)
- n°1 Anti-contamination kit
- n°1 PVC belt
- n°1 padded belt

Full face mask to choose between BLS 5150 and BLS 5400*
BLS TMP3 high efficiency dust filter, replaceable*

* Sold separately

TECHNICAL DATA

MINIMUM FLOW*	160 l/min
WEIGHT single unit	1,30 Kg
WEIGHT Container box	1,80 Kg
WEIGHT Complete sales package	4,46 Kg
CHARGING TIME	6 hours

* Declared by the manufacturer

LIGHT/SOUND INDICATORS

Indicators: light signal (green, yellow, red, blue) for battery charge level, acoustic alarm for low battery.
Filter clogging monitoring with acoustic alarm.
