

Flexible unsupported neoprene work gloves, guarding against varied chemicals and solvents

- **Heightened flexibility:** AlphaTec® 29-500 industrial gloves' mix of neoprene and rubber maintains its elasticity, even at lower temperatures
- **Elevated comfort:** As they are lined with pure cotton flocking, they provide better perspiration absorption, ensuring greater wearer comfort
- **Reduced hand fatigue:** Due to their blend of neoprene and natural rubber, they ensure lightweight hand protection that is less tiring with sustained wear
- **Enhanced defenses:** Their unique formulation makes these safety gloves resistant to a wide range of acids, caustics, alcohols and solvents
- **Assured antistatic capabilities:** AlphaTec® 29-500 chemical-resistant gloves also comply with EN1149 antistatic standards

Industries

- Automotive
- Automotive Aftermarket
- Chemical

Applications

- Chemical Handling
- Maintenance
- General Purpose Auto Aftermarket

Previously known as: NEOTOP™ 29-500

Key Features

- **Neoprene coating:** For flexible, cold-resistant hand protection
- **Pure cotton flocking:** Perspiration absorption, for greater comfort
- **Natural rubber content:** Lighter weight, for lesser hand fatigue

Vulcanization Chemical Accelerators

- Diphenyl guanidine
- Diphenyl thiourea
- Natural rubber proteins
- Zinc Diethyldithiocarbamate

Only a very small number of users may be sensitive to this ingredient(s) and hence may develop irritant and/or allergic contact reactions.
