

BAXTER from BOLLE SAFETY

BAXTER offers total comfort thanks to its highly wrap-around frame. With its waterproof foam and ingenious system for attaching the strap, BAXTER provides effective protection from sprays of solids and liquids, and from dust. These hybrid spectacles also resist medium energy and extreme temperature impact. BAXTER is available in clear (indoor use), smoke (external use) and CSP (mixed-use indoor/outdoor). All versions benefit from the exclusive double-sided PLATINUM anti-scratch anti-fog coating to ensure more safety throughout the day. BAXTER will soon be available in the RX range. ■

TITAN from Ion Science

The EPA has recently tightened its regulations surrounding Fence Line Monitoring at refineries due to the hazards of benzene within the environment and the impact it can have on residents living close by.

TITAN from Ion Science is the world's first and only continuous benzene-specific monitor. TITAN offers a real time warning alarm to the hazards of benzene providing fast, accurate detection, detecting benzene to sub ppm levels.

Benzene detection? TITAN is the answer. ■

NITRAS Presents New Clothing Range MOTION TEX LIGHT

The new series MOTION TEX LIGHT includes trousers, bib pants and work jackets in various colours. The series combines highest functionality, a perfect wearing comfort and an attractive design. Short and long trousers, bib pants and working jackets, in three colours – the new MOTION TEX LIGHT series is expanding the NITRAS product range by high-quality work clothes. In addition to functionality and comfortable fit, also the design is of great importance. "Nowadays, work clothes are no longer only functional. Work clothes must be entirely consistent with functionality and design." says Jens Thome, CEO of AS Arbeitsschutz GmbH. ■

Situational Awareness, Enhanced Attention

You have two great reasons to protect your hearing – your ears. The 3M™ PELTOR™ ProTac™ III Headset with level-dependent function for ambient listening helps you focus on your work and communicate with colleagues in noisy environments, without removing the hearing protection. Full stereo feedback will allow you to hear and better determine direction of alarms, warning cries, reversing vehicles and so on. ■

"Ignite Series" – SKYLOTEC's Harness Series

For selection of the correct PPE against falls from a height, optimum fit of a harness and its ease of handling are decisive aspects. In the context of ergonomics and design, SKYLOTEC sets new benchmarks with its harness range "Ignite Series". The many sophisticated details that give the new harness series an advantage over conventional products include, for example, padding that is specifically designed for human anatomy and ensures optimum distribution of loads. For employees who have to wear their harness on a daily basis for several hours, this is a substantial relief. The harnesses from this series are available in different versions suitable for almost all scopes of application. ■

Get Wired for Safety with Keeline

Kee Safety, a leading fall protection specialist, has redesigned its KeeLine® Lifeline system to allow easier installation on bitumen membrane roofs. KeeLine® is a wire-based horizontal lifeline providing continuous fall protection in areas where guardrails are not suitable. The system offers safe access for up to three users across the whole roof. KeeLine® is suitable for membrane, metal profile, standing seam and composite panel roofs. KeeLine® is fully compliant with the requirements of EN 795 2012. ■

The Challenges of the Conventional Mask

Conventional masks do not address the discomfort of extended mask use, and trap heat, humidity and carbon dioxide as you exhale.

Mask wearers often have to endure stuffiness caused by accumulated heat and moisture in the mask. Inhaling exhaled carbon dioxide can also cause symptoms such as dizziness, headaches and reduced alertness.

The AIR+ Smart Mask attaches an innovative micro ventilator to a protective mask, transforming it into an advanced mask that ensures you breathe clean air all day by expelling the heat, humidity and carbon dioxide trapped within the mask. ■

Green Protection® Made from the Energy of the Sun®

What is your Glove print? Our impact on the environment is tremendous and it does not seem to end. But it can all stop right here at the tip of your fingers with the simple but radical action of choosing a greener protection for your hands, arms and body. What if you started to wear the best safety glove ever designed for you and the world around you? What if this glove incorporated the materials and processes kindest to your skin and the environment? What if not only you, but everyone together, would join hands and choose a greener protection? Then a dream would come true, a dream of building safely our world for us and the generation to come in the most sustainable way. Please join us and our partner SCHWAN in Germany on this green journey and choose Green protection®. ■

Protection from Arc and Thermal Hazards

The BUFF® PROFESSIONAL 2016 collection, a line of specialised tubular headwear for industrial protection and safety, presents its new products ARC PROTECT + FR Tubular and ARC PROTECT + FR Balaclava, specially designed for professionals in the electrical industry that need protection against electric arcs, as well as thermal hazards from heat and flames. The multi-functional tubular and balaclava versions are both made with aramid fibres and fire-resistant rayon fibres for maximum burn protection, providing exceptional comfort and breathability. These items have permanent fire-resistant and anti-static properties and are certified to standards EN ISO13688/13, EN 1149-5/08, EN ISO 11612/08, EN 15614/07 and EN 61482-2/09. That have an ATPV rating of 17.70 cal/cm². ■

ELMETAL 5s Solutions for Lockout / Tagout

5s is the name used for the workplace organisation method involving the following five steps: sort, set in order, shine, standardise, and sustain. LOTO Cabinets and boards produced by Elmetal employ the above steps to organise and store locks, devices and tags, while upholding procedures of the entire system. The main aim for implementing 5s is increasing safety at work. Elmetal LOTO boards and cabinets are not only an aesthetic and efficient way of identifying and storing items used at work stations, but they also help in maintaining high standards of health and safety. ■

Visit us on our stand no. 142 in Hall 1 at the Expoprotection Exhibition in Paris (7 – 9 November.)
